Chairman Committee on Lectures and Meetings.

A Card.—The attention of the citizens are called to sympathize with the CONGREGATIONAL CHURCH in SIXTi-ST, between 2d and 3d avs., New-York. They are about to be distressed by foreclosure and disposeesed of their property, with which they have long struggled, and have raised and paid within themselves, together with the aid of many citizens, over light Thousand Boline since the 3d of March, 1823, and have done more toward redeeming themselves, probably, than any other congregation who have preceded them; and now, for the want of \$2,600, they are in infinent camper of being distressed by foreclosure, beside losing all that they have paid. They (the congregation) have piedged among themselves to raise the \$600 within the time specified; if, in the appeal, the friends of humanity and the benevolent citizens of New-York and its vicinity will assist them in raising the \$2,000. In the event of raising the shove amount, they can secure \$7,000, which will place them in easy position.

The above statement we know to be all perfectly correct.

from which this careful account of the grandest of human enterprise is derived:

New York, Aug. 18, 1858.

Messrs, D. Appleton & Co., New York, Aug. 18, 1858.

Gentleman: I take much pleasure in certifying that Mr. John Mullaly was with us in the Newfoundland Telegraph Expedition in the year 1855, and that he was on board the Nisagra during the Atlantic Telegraph Expedition in 1857-8; that he was present at the trial trip in June last, and the final expedition which terminated in the successful landing of the cable in Trinity Bay, Newfoundland, on the 5th of August, 1859.

Bis indefatigable exertions during all this time in procuring every fact in connection with the enterprise are deserving of the highest praise.

I have the fullest confidence in his marrative with regard to every incident that took place on board the Nisagrar during the process of laying the cable, and I will continue to farmish him with every information in my power relating to the formation, progress, and success of the Atlantic Telegraph Enterprise.

I remain, gentlemen, very truly your friend.

The main gentlemen, very truly your friend.

The devery opportunity, of which he availed himself to the outpost, to procure the fullest details in regard to the Atlantic Telegraph Enterprise.

Gentlemen: I have been informed that Mr. John Mullady is about to publish a narraitor of the Atlantic Telegraph Expeditions of 1857 and 1858. It afforts me pleasure to say he has accompanied us in the Niagara on both expeditions, and collected the fullest information, and I know of no one better qualified to give a correct and graphic history of our undertaking.

Respectfully, your obsolute is servan.

"A. S. Rec, author of "A Long Look Ahead" and "The Star and the Cloud, is a fintion writer whose works may be safely commended. In the charm of simplicity and naturalness, and in power, he ranks far, far above the common rabble of novel writers, and, if we may make such a conclusion from the two works of his which we have read, he has not published one line which dying he would wish to blot." [N. Y. Independent. "It is not impossible that this author's rather peculiar movels may yet become a school by themselves, which will find innitators. They are unique, full of human nature, and, what is remarkable in a writer, each one seems to be an improvement upon the previous one."

"Mr. Rue evidently knows how to touch the heartstrings, indeed, he aweeps them with a unster hand. At one time we find it impossible to restrain the gualing tear at another every rightle nerve is in full exercise."

HOT WATER FURNACE,
Manufactured and sold by
BROWN'S WATER FURNACE COMPANY,
No. 724 Canal-st.

This Furnace has been in successful use for six years, and
with the late improvements, is proeminently the best and most
efficient apparatus for Warming and Ventilating Dwellings,
Hospitals, School Buildings, &c. It affords an abundant supply
of delicious air, of the temperature of Summer heat, free from
gas or dust, and no less pure than when taken from the external
atmosphere.

This Furnace is adapted to buildings already occupied, and
can be substituted for hot-air furnaces and other modes of heating known to be dangerous and detrimental to health.

Circulars, references and further particulars can be obtained at
